A novel and exciting online  
extension of the series

1  
Did You  
Know This?

Scorpion venom is the most expensive liquid in the world.

A chameleon's tongue can be up to twice the length of its body.

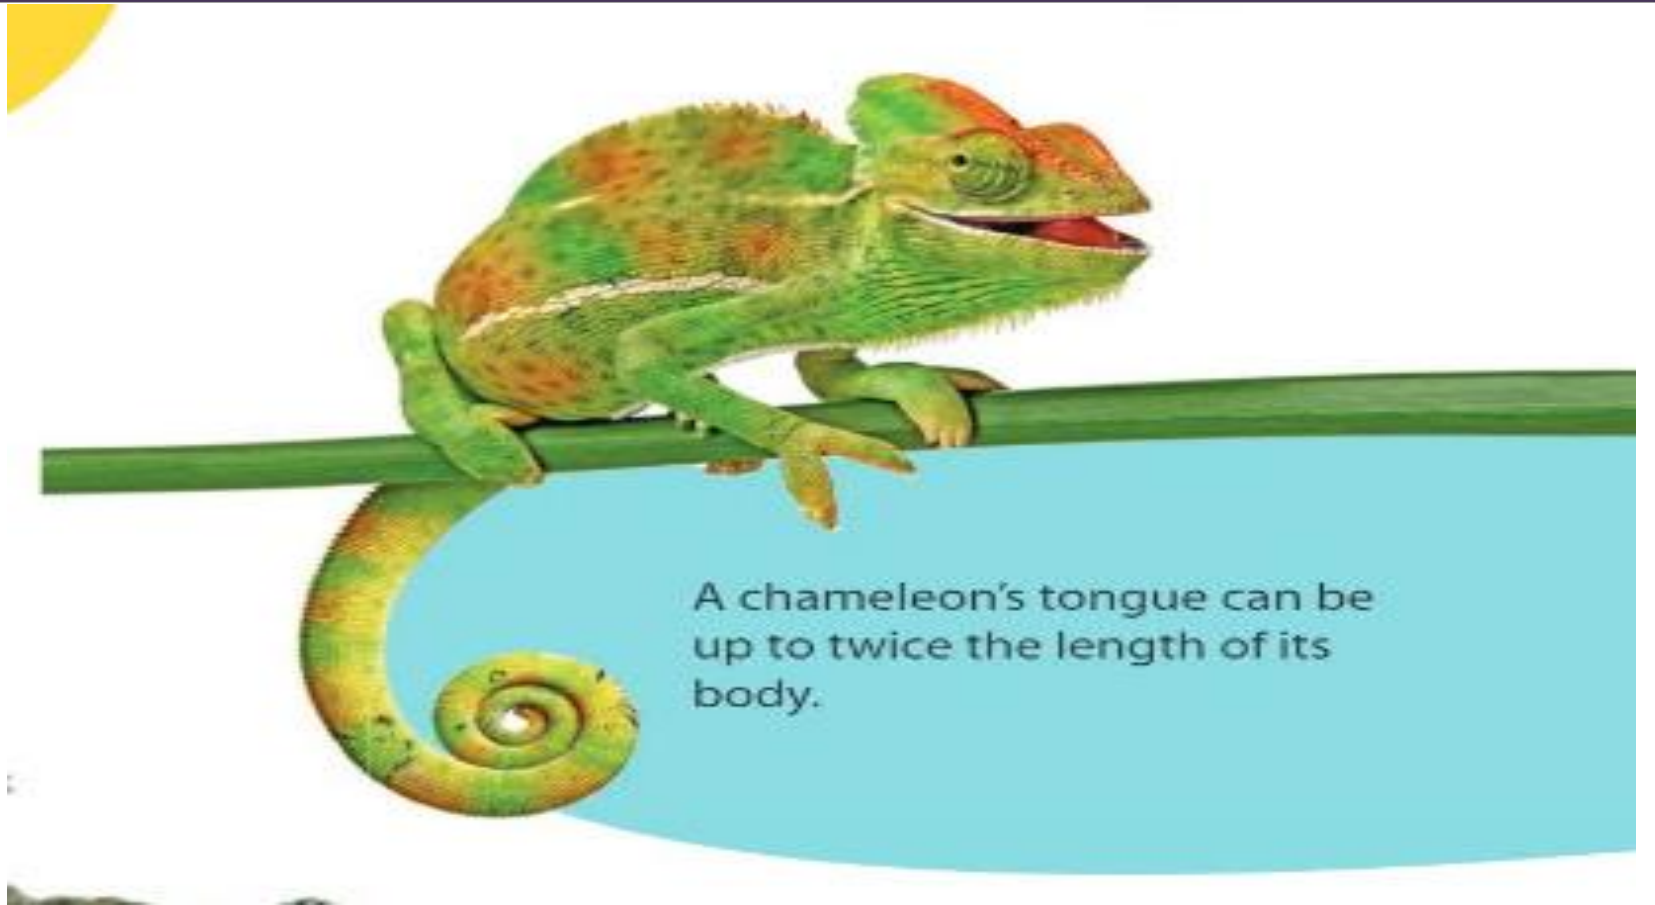

A young crocodile's teeth are continuously replaced by new ones every month.

Some salamanders breathe through their skin.

The tusks of a walrus can be as long as one metre.

A chameleon's tongue can be up to twice the length of its body.

Chameleons are arboreal animals(lives on trees) and has a property to change its colour to protect itself from its predator. These lizards catch prey with their long, sticky, **tongue**, which fires out at great speed from the mouth. **Chameleons** are found mainly in Africa. A **chameleon's tongue** shoots out of its mouth and hits the prey in about 0.007 seconds.

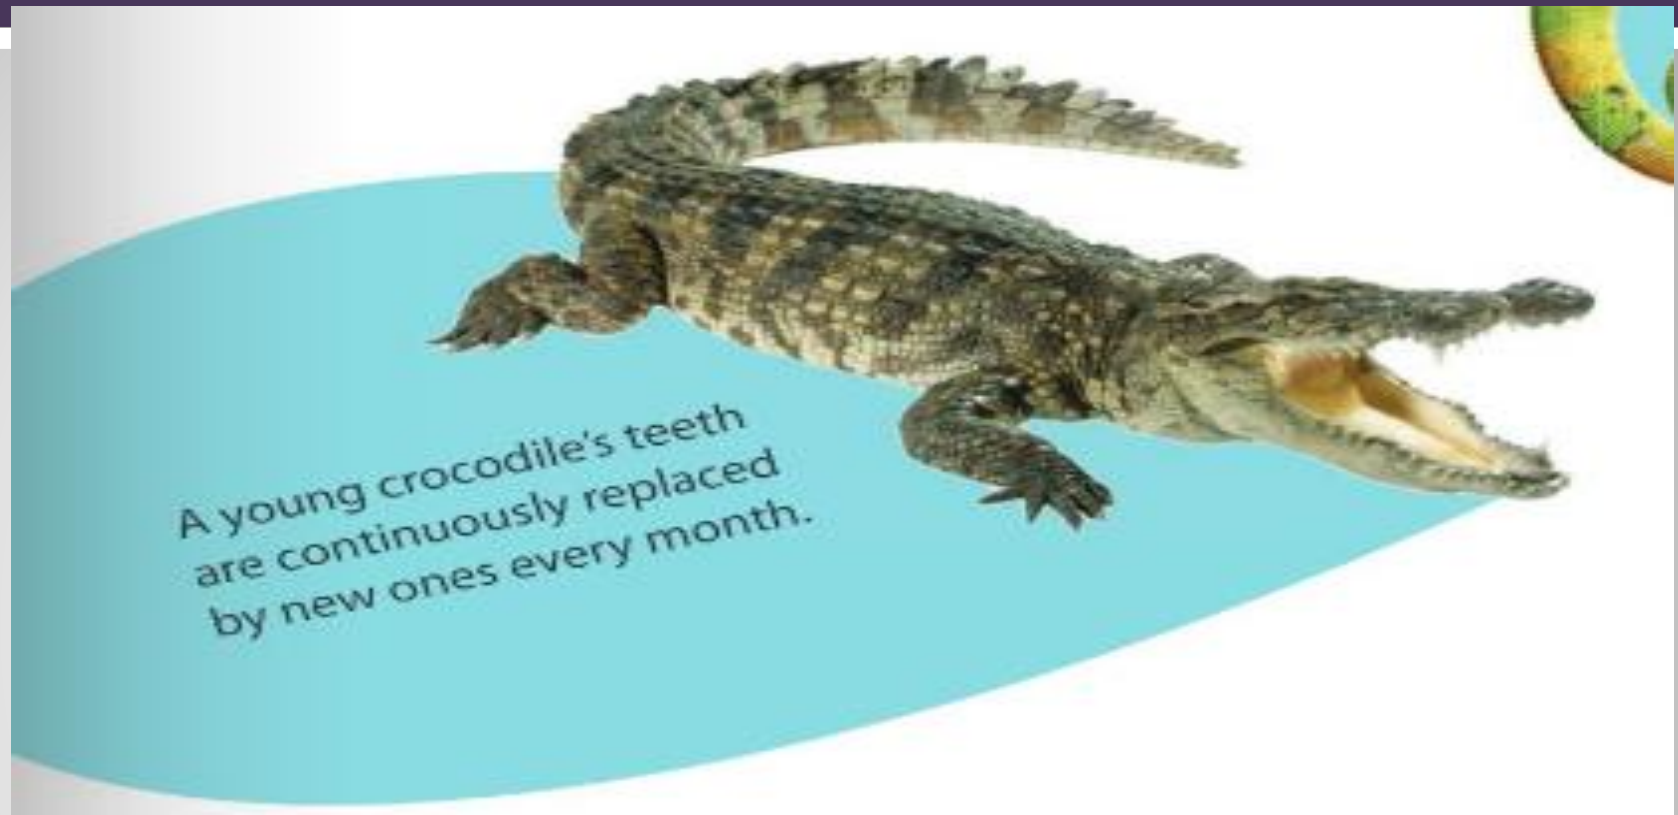

Scorpion venom is the most expensive liquid in the world.

**Salamanders are amphibians (can live both on land and water). Commonly called lungless salamanders, they breathe through their skin and the thin membranes in the mouth and throat.**

**Crocodiles are reptiles (animal that crawls or moves on its belly or by short legs). Crocodiles use their incredibly long teeth and strong jaws to clamp down on prey, ensuring it cannot escape. Crocodiles replace their teeth continuously, as they lose many in battles with prey and conspecifics.**

The tusks of a walrus  
can be as long as one  
metre.

**Walruses are mammals (can give birth to the babies). The most prominent feature of the living species is its long tusks which are present in both male and female walruses and can reach a length of 1 m (3 ft 3 in) and weigh up to 5.4 kg Tusks are also used to form and maintain holes in the ice and aid the walrus in climbing out of water onto ice.**

- 1) PORCUPINE
- 2) CHAMELEON
- 3) HORSE
- 4) YAK

2  
Amazing  
Creatures

Pictured below are some animals that are amazing in many ways. Identify them and write their names.

1  
This animal raises its spines when attacked by an enemy.

.....
