

DELHI PUBLIC SCHOOL, GANDHINAGAR

Academic session 2021-22

Workshop Report

Title: Classroom Management and It's Three Components	Date:05/03/22
Venue:Audio Visual Room	Participants: Pre – Primary Staff

To achieve the teaching goals, effective teachers should also act as effective classroom managers. To brush up the teaching skills, a workshop was conducted by Ms. Aparna Mishra for the pre-primary teachers on 5th March 2022. In a successful classroom management, student's needs are the heart of the teaching process.

Effective classroom management strategies and skills are essential even for the most talented teacher. Learning simply cannot occur alongside misbehaviour and chaos. Instruction flourishes upon leading a classroom environment that promotes a collaborative community, encouraging student voice, creativity, leadership, critical thinking, and effective teamwork. By taking part in this workshop on effective classroom management, teachers learnt how to include reflective moments and peer-education in their teaching practice to monitor and improve motivation and classroom behaviours. At the end of the workshop, teachers were able to implement modern pro-active practices including set up a classroom structure based on a positive, accepting, inclusive, motivated, engaging, and safe learning environment to improve their classroom management and teaching skills and ease their tasks in the classroom.
