

DELHI PUBLIC SCHOOL, GANDHINAGAR

Academic session 2020-21

Event Report

Title: Activities conducted in September month	Date: 1 Sep to 30 Sep 2020
Venue: Online Virtual Classroom	Class:

Creating, exploring and discovering this is how we make our students learn at DPS Gandhinagar, we believe in providing hands on experience from a very early age. Various activities were conducted in the month of September'20 for the students of LKG. Students engrossed themselves in the germination activity. It was a fantastic experience for them as it was simple, relatively quick process and easy to observe. As we used a transparent plastic glass for germination it was easy for our little ones to see and understand what really happens under the soil. Watching seeds growing was an amazing experience for them. It gave them the opportunity to watch how seeds grow into a big plant and what do they need to grow. Our seed growing activity turned out amazingly well, and each one of them enjoyed checking on the progress each day.

Water colour activity was done. Students were explained about the details of colouring like the correct way to hold the brush, techniques to colour and strokes to follow.

They were engrossed making their pictures colourful and using a brush to colour was totally a different new experience for them. They were admiring their sheets and patting themselves for such an incredible work. Various other activities like sorting the beads, forming the numbers using strings and pasta, cloud & droplet activity were conducted. These activities helped them in enhancing their number, shapes and colour recognition skills, finer motor skills, sorting and classification skills, counting skills. Children enjoyed a lot as they were fully engrossed in these playful activities.

Sorting Activity

Germination Activity - LKG

WATER COLOUR ACTIVITY

Fun with Pasta

Number Activity
