Academic Session 2024-25  
Event Report

Title: Theories and Approaches for Foundational Years	Date: 15.03.25
Venue: AV Room	Participants: Pre-Primary Teachers

**“Learning gives creativity,creativity leads to thinking,thinking provides knowledge,and knowledge makes you great.”**

A workshop on “Theories and Approaches for Foundational Years” was organized for Pre-primary teachers by Ms. Monika on March 15, 2025. The main objective of the workshop was to create awareness about the theories and approaches which helps to create a strong foundation in the early years lays the groundwork for lifelong learning and development for learners.

The workshop also emphasized that by integrating theories like Piaget’s and Vygotsky’s with approaches like Montessori and Reggio Emilia, educators can provide children with a supportive, engaging, and nurturing environment. The Workshop was an amalgamation of PPT, Video Presentation, fun-filled activity, and discussion. To sum up, the teachers were empowered with approaches that they understand, learn and rightfully implement an inclusive environment in and outside their classrooms. Teachers participated with full enthusiasm making the workshop interactive and successful.
