Event Report

Title: Model-Making Activity- Sacred Landscape: How Geography Shaped India's Temple Heritage	Date: 05/07/2025
Venue: Classroom	Class: XII

The Humanities Department of Delhi Public School, Gandhinagar, successfully conducted an engaging Co-Curricular Competition for Class XII on 05 July 2025. Themed “*Sacred Landscape: How Geography Shaped India's Temple Heritage*”, the activity inspired students to delve into the unique connection between geography and temple architecture in India.

Students worked in collaborative groups to create detailed models of iconic temples such as the Sun Temple at Konark, the Shore Temple at Mahabalipuram, and the Jagannath Temple at Puri. Each model highlighted how natural elements—coastal winds, elevation, local stone types, and riverine locations—shaped the construction, layout, and orientation of these sacred sites.

The event was marked by creativity, research, and confident presentations. Students attached flags and labels to highlight key geographical influences and presented their understanding clearly within the given time.

The activity was judged based on Historical and Geographical Accuracy, Clarity of Explanation, and Presentation.

The list of winners is as follows.
