

DELHI PUBLIC SCHOOL GANDHINAGAR

Academic Session 2025-26

Event Report

Title: Visit to Aquatic Gallery	Date: 24.02.26
Venue: Science City Ahmedabad	Class: Pre-Primary Sections

On February 24, 2026, the Pre-primary children visited the Aquatic Gallery at Science City as part of an educational excursion. The visit aimed to help children explore aquatic life and learn through observation and real-life experiences.

During the visit, the children observed around 188 species of fish. They were delighted and excited to see the vibrant colours, shapes, and movements of the fish. The highlight of the visit was the underwater tunnel, where children could see sharks and rays swimming above and around them. This experience filled them with awe and excitement, and many children expressed their joy loudly while watching the sharks glide overhead.

The children also visited the touch pool on the first floor, which gave them a closer and more interactive learning experience. In addition, they explored various themed zones representing diverse global aquatic habitats, helping them understand the variety of life found in different water ecosystems around the world.

Overall, the visit was highly engaging, informative, and enjoyable. It sparked curiosity and enthusiasm among the children and provided a memorable learning experience outside the classroom.
