

DELHI PUBLIC SCHOOL GANDHINAGAR

Academic Session 2025-26

Event Report

Title: Mind Map on “HTML Tags”.	Date: 17/01/2026
Venue: Respective Class-rooms	Class: VII

“Learning becomes more effective when ideas are visually organized and practically explored.”

To promote hands-on learning and conceptual clarity, the Computer Department of DPS Gandhinagar organized a CCA activity titled **“Mind Map on Tags in HTML”** for **Class VII** students on **17 January 2026**.

The activity aimed to help students understand the structure and usage of various HTML tags through visual representation. Students worked in teams and created colorful and well-structured mind maps highlighting important HTML tags such as basic structure tags, formatting tags, etc.

Students prepared mind maps using chart papers, sketch pens, sticky notes, and other creative materials. Each student presented their work confidently, explaining the purpose of different tags. This hands-on approach made learning HTML more engaging and easier to comprehend.

The activity encouraged creativity, analytical skills and logical thinking, while also strengthening student’s understanding of web development concepts.
