READING

The environment is everything around us that we can see, hear, touch, smell and taste. It includes all living things like plants and animals as well as non-living things like air, water and soil. We need to take care of our environment because it helps us to live and grow. We should not litter or pollute our environment by throwing garbage on the streets or in the water. We should plant more trees and use less plastic to keep our environment clean.

There are many types of pollution such as air pollution, water pollution and noise pollution. Air pollution occurs when harmful gases and particles are released into the air by factories, cars and other sources. Water pollution occurs when harmful chemicals and waste products are dumped into rivers, lakes and oceans. Noise pollution occurs when loud sounds from traffic, construction sites and other sources disturb people and animals.
