Academic Session 2026-27

Event Report

Title: FUN WITH PROBABILITY	Date: 04/04/2026
Venue: Classrooms	Class: X

The activity “FUN WITH PROBABILITY” was conducted with the objective of making the concept of Probability engaging, practical, and enjoyable for students. The session aimed to help learners understand how probability plays a significant role in everyday decision-making and real-life situations.

Students participated in interactive activities such as coin toss experiments, dice rolling tasks, and card selection exercises to explore both theoretical and experimental probability. They recorded outcomes systematically, calculated the probability of various events, and compared their experimental results with theoretical predictions. This hands-on approach strengthened their understanding of favourable outcomes, total outcomes, and the probability of simple events.

The activity encouraged logical thinking and analytical reasoning as students observed patterns, interpreted results, and drew meaningful conclusions. Working collaboratively in groups, they discussed strategies, shared findings, and justified their answers using mathematical concepts.

The “FUN WITH PROBABILITY” activity successfully demonstrated that probability is not merely a theoretical topic but a concept closely connected to real-life experiences- whether predicting outcomes in games, forecasting events, or making decisions based on chance. The session enhanced students’ conceptual clarity, teamwork, and confidence in mathematics.

List of Winners

Sr. No.	Admission No.	Name of Students	Class & Sec.	Group Name	Position
1.	06015	ARYAN THAKKER	X A	Group V	I
