Paradigm of HCF & LCM AT DPS, GANDHINAGAR

Students are often unable to relate the importance of mathematics to the real world. So, to provide a challenging & engaging mathematical experience and to motivate and foster mathematical creativity amongst our budding mathematicians, the Mathematics Department of DPS Gandhinagar organised an Inter Class Competition 'Paradigm of HCF & LCM' for the students of Class VI. Students enthusiastically showcased their talent by preparing a working model to find LCM / HCF between two numbers using day-to-day life objects like coins, beads, straws, ice cream sticks etc.
