

DELHI PUBLIC SCHOOL GANDHINAGAR
Academic Session 2024-25
Event Report

Title: Workshop on Addressing Specific Problems of Children	Date: 1.10.2024
Venue: Audio Visual Room-Pre-Primary Department	

Delhi Public School Gandhinagar always focuses on the holistic development of students. Keeping this in mind, a workshop for teachers was organized covering key areas such as cognitive growth, social skills, emotional regulation, motor development, and effective classroom management. Ms. Sangeeta Joardar conducted the workshop on October 01, 2024 to highlight the practical strategies to address developmental and behavioural challenges in preschool children under the heading of “Addressing the specific problems of the children”.

The session began by sharing a heartfelt poem highlighting the pivotal role of teachers in shaping young minds and fostering the holistic development of children. The session focused on the solutions to manage issues such as attention span, social interaction, and emotional regulation. The program included sensory activities to improve focus, cooperative games to enhance social and communication skills to help children express their emotions. Additionally role-playing exercises were conducted to teach conflict resolution and fine motor skill activities for better hand-eye coordination.

Feedback from participants highlighted the usefulness of practical demonstrations in understanding the children's needs. The session concluded with the key note “patience, observation, and creative engagement is the key to deal with preschool children's issues”.
