France, a nation rich in history and culture, has a deep impact on the world. Its rich heritage, shaped by centuries of artistic expression and innovation, continues to inspire people around the globe.

To foster a deeper appreciation for France's cultural legacy, Class VII students at Delhi Public School, Gandhinagar, participated in a 3D model and poster-making activity. The students demonstrated their creativity and skill by crafting visually stunning representations of iconic French landmarks.

From the Eiffel Tower to the French Riviera, the students' projects showcased a wide range of artistic styles and techniques. Their work not only reflected their understanding of French culture but also highlighted the importance of art in developing critical thinking and creative problem-solving skills. This activity was a part of their Art-Integrated-Learning and they were assessed on their presentation in the French Language.
